(+63) 917 132 6976

www.vdemtech.com

Introduction

A young company with highly experienced Engineers who excels at their field of expertise set out to be a fast-growing engineering service provider. We provide total solution to your problems. For every new problem we encounter we learn and adapt to the certain situation should the need ever present itself, further boosting our engineer knowledge and providing our clients an assurance knowing that Vdemtech is not and will not be afraid to tackle any new problems that the situation throws upon us.

Our Services

Here at Vdemtech we value our customers by providing them with a wide variety of services to be offered.

Technical Services

- Specialize Trouble Shooting and diagnostics in Elevator and Escalators.
- Troubleshooting, repairs and overhauling of various kinds of industrial Electronic, Mechanical, Hydraulic and Electrical equipments. While also including Plant Control System troubleshooting.
- Installation and commissioning of all kinds of Industrial Electrical Generating & Mechanical Equipments.
- Skilled Manpower Supply

Engineering Services

- Design, assembly and installation of industrial automation using PLC, DCS, Logic Circuits, Electrical relays or Pneumatic Control Systems
- Control & Electrical Upgrading.
- Project Management and Administration

Consultancy Services

- CMMS Administration Consultancy
- Industrial Machinery Installation Consultancy
- Maintenance Management and Consultancy
- Project Management Consultancy

Training Services

- Maintenance Management Training
- Tailored Fit Technical Training

Clientele Accreditation

Elevator

Note! The services that VDemtech can offer are not limited to the ones listed below. The list of services below only includes those that are more frequently required by our client.

Elevator Bearing Replacement

Elevator load test

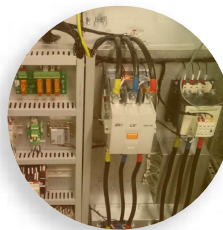

Elevator main rope replacement

Elevator door sensor installation and troubleshooting

Elevator Motor Rehabilitation

Elevator Control System Modernization

Escalator

Note! The services that VDemtech can offer are not limited to the ones listed below. The list of services below only includes those that are more frequently required by our client.

Escalator Step
Chain Replacement

Handrail replace-
ment and cleaning

Escalator dirt and
rust removal

Escalator Motor
Rehabilitation

Escalator drive
chain adjustment

Friction wheel
recapping and
replacement

Some of the Projects Undertaken as VDEMTECH

CALIFORNIA GARDEN SQUARE CONDOMINIUM

- Elevator Diagnostics and Troubleshooting
- Elevator rope removal and Installation
- Inoperative lift repair
- Elevator Inverter Repair
- Elevator Control System Modernization

NEW COAST HOTEL

- Elevator Control System Modernization
- Motor bearing refurbish and lift gearbox cleaning
- Elevator diagnostics and troubleshooting
- car door control board procurement and installation
- Elevator Planetary Gearbox Overhaul
- Escalator handrail replacement

MARINA SQUARE PROPERTIES

- Solenoid Brakes
- Escalator Steps dirt and rust removal
- Escalator handrail procurement and installation
- Elevator diagnostics and troubleshooting
- Casino Escalator steps cleaning
- Elevator landing door repair

OCEANAIRE HOTEL & RESIDENCES

- VFD (Variable Frequency Drive) board repair
- Elevator diagnostics and troubleshooting
- STM Board Repair
- Fire Protection Control Bard
- LOP Repair
- SIAP Board Repair
- Bootloader board repair
- STM Installation and VFD Board Repair

NEW WORLD MANILA BAY HOTEL

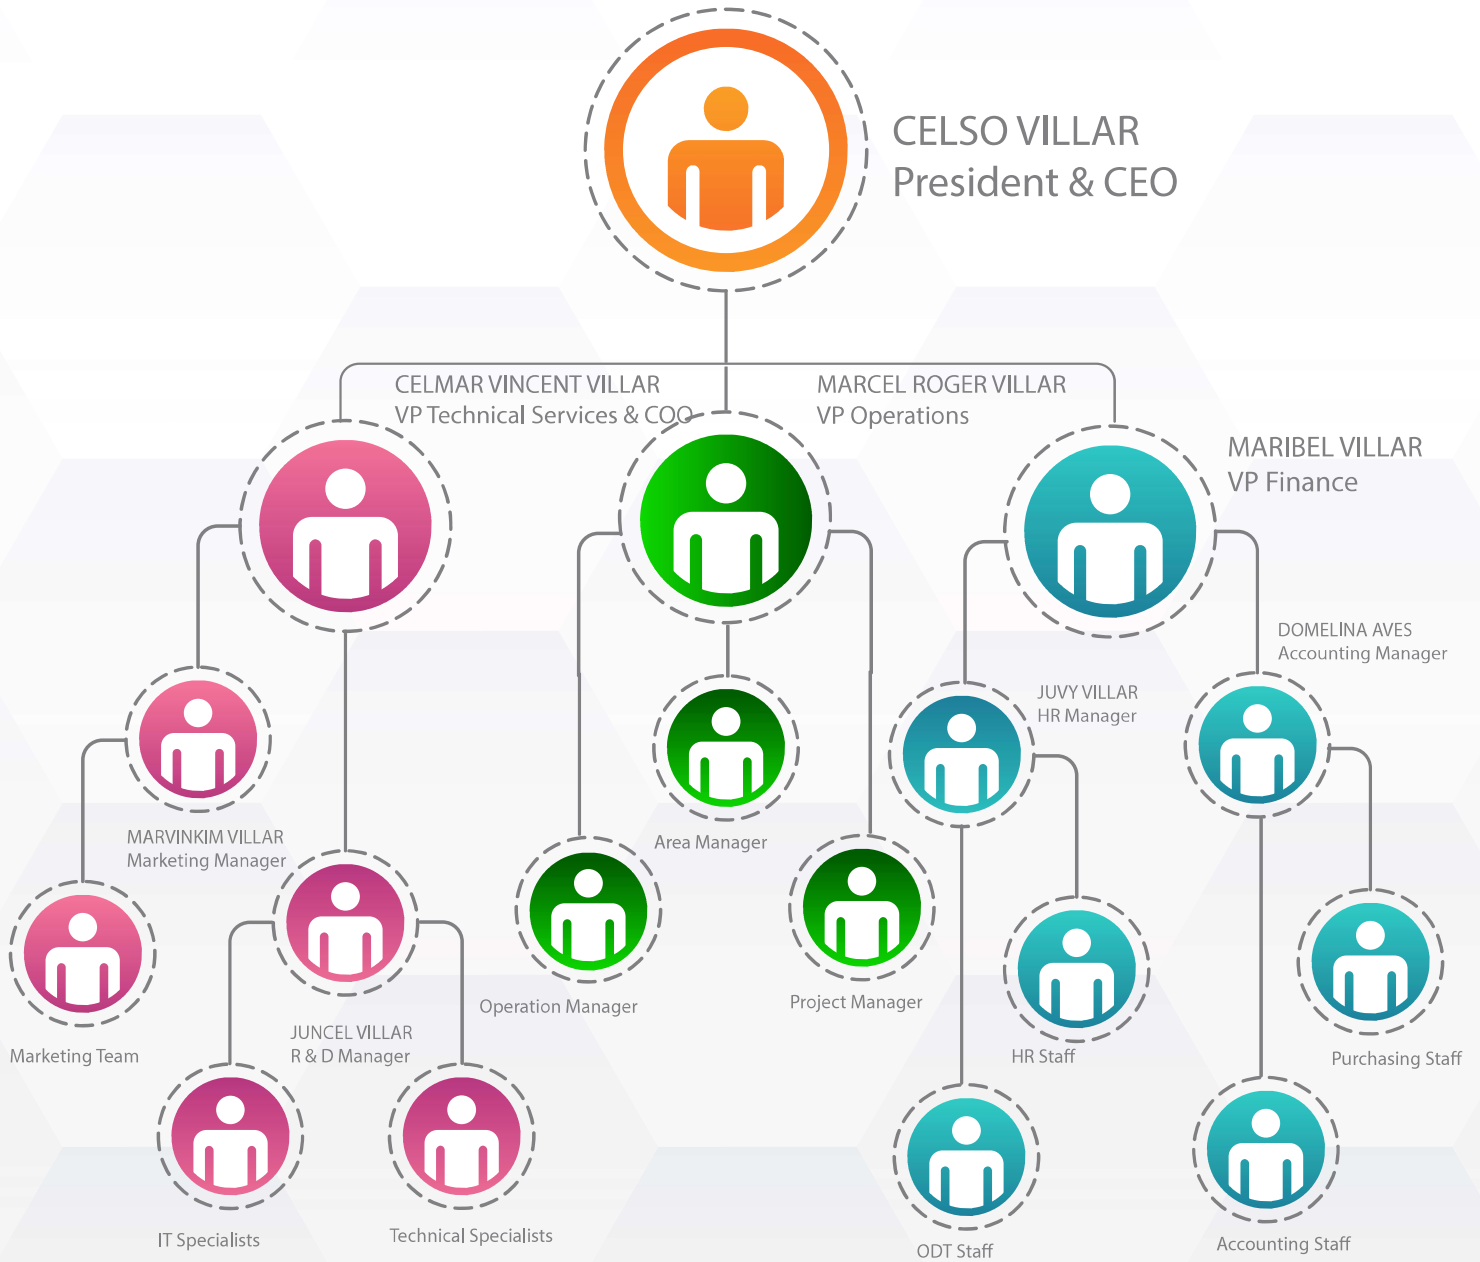

- Planetary gearbox Overhauling and resealing
- Escalator main drive motor refurbish
- Escalator diagnostics and troubleshooting
- Main Traction Motor Refurbish
- Tangential Rail Board Repair
- Planetary gearbox Internal Cleaning and resealing
- Landing Door Board Repair
- Solenoid Brake Board Repair
- Counterweight pulley rehabilitation

”

"I never did anything worth doing by accident, nor did any of my inventions come indirectly through accident, except the phonograph. No, when I have fully decided that a result is worth getting, I go about it, and make trial after trial, until it comes."

— Thomas Edison

Organizational Chart

RAYMUNDO A. GUAPE
Elevator Consultant PME

DEXTER G. MENDOZA
Mining Consultant Doctor
of Metallurgy

RODOLFO A. VILLAR
Marine Engr. Consultant
Chief Marine Engineer

NICHOLAS TAN
Mechanical Consultant
PME

DANILO E. FERNANDEZ
Electrical Consultant PEE

MARVIN C. PINON
Automation Consultant

JUNCEL G. VILLAR

IT-Research and Development Manager

VDEMTEch Inc.

2nd Floor Causing Feria Building, Block 45, Osmeña Boulevard, Sambag 2, Cebu City, Cebu, Philippines

CAPABILITIES AND EXPERIENCES:

Well-qualified Full Stack Developer familiar with wide range of programming utilities and languages. Knowledgeable of backend and frontend development requirements. Handles any part of process with ease. Collaborative team player with excellent technical abilities offering 4 years of related experience.

Expert in control system programming and software reverse engineering, expert in operations and maintenance system programming, and more...

A.) Web Development:

- Provided front-end website development using WordPress, Hubspot and other editing software.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX and JSON coding.
- Coded websites using HTML, CSS, JavaScript and jQuery languages.
- Built and styled new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- Oversaw back-end development using PHP to maintain website integrity.
- Applied emerging technologies to update and maintain site applicability.
- Discussed site and app requirements with clients to produce actionable development plans.
- Generated web hosting presence to accommodate specified needs and maintain files on account.
- Used Javascript, SQL and HTML to develop app-solutions.
- Developed efficient and maintainable software according to business objectives and needs of clients.
- Reviewed code, debugged problems and corrected issues.
- Designed testing protocols to locate issues within system.
- Worked with back-end developers to design APIs.
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Boosted network, system and data availability and integrity through preventive maintenance and upgrades.

B.) Accomplishments:

- Hosted an online web server using virtual private server
- Resolved product issue through consumer testing.
- Used Microsoft Excel to develop inventory tracking spreadsheets.
- Developed custom made software for inventory tracking system
- Developed an interactive website for VDEMTEch Inc..

C.) Programming Language:

- Javascript
- Vuejs
- Angularjs
- PHP
- Laravel
- C++
- C
- Java
- Python
- Batch Script
- SQL

CELMAR VINCENT G. VILLAR

VP Technical & COO

VDEMTECH Inc.

2nd Floor Causing Feria Building, Block 45, Osmeña Boulevard, Sambag 2, Cebu City, Cebu, Philippines

CAPABILITIES AND EXPERIENCES:

I am a graduate of Computer Engineering with experience in the fields of plant Control Systems (DCS and PLCs), Instrumentation and Electrical Planning and Design, Project Management and Elevator Control Installation, Commissioning and control systems integration. For a total of 6 years of work experience:

Expert in control system hardware design, retrofitting and reverse engineering, expert in control system troubleshooting, expert in electronics repair, commissioning expert, and more...

A.) Process Projects (Research and Development) Engineer for Plant Wide Automations:

- Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.

B.) Control Systems (DCS and PLCs):

- Analyzed DCS and equipment system process and data to create an online Monitoring System for Refinery and Slag Flotation Plant (SFP) at Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.
- One of the spearheads for the Real-time Downtime, Uptime and Event Tracking (RtDUET) for Refinery at Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.
- Anode Stripping Machine (APM) Ultrasonic Thickness measuring system Troubleshooting, Repair, Calibration and Commissioning for Refinery at Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.

C.) PI System:

- Developed PI Monitoring system for Refinery at Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.
- Conducted Training and Orientation for Reliability Engineering Group on PI System and PI Process Book Operation.
- Conducted Training and Orientation for Process Engineering Group on PI System and PI Process Book Operation.
- Adept in PI Process Book operation.

D.) Control System Design

- Lift Control and Card Integration System (a device that communicates Elevator Control to any key card system) for NEW COAST HOTEL.
- Have developed auto reset functions for hotel lifts during power fluctuations do avoid lift man traps for NEW COAST HOTEL.
- Have developed online automation controls on incubators for HERICA Duck egg processing.

E.) Lift Modernization and Commissioning

- Lead the 6 Lift's Control Systems Modernization and Commissioning for NEW COAST HOTEL
- Lead the 2 Lift's Control Systems Modernization and Commissioning for California Garden Square (CGS).

CELSO A. VILLAR

President & CEO

VDEMTECH Inc.

2nd Floor Causing FERIA Building, Block 45, Osmeña Boulevard, Samba 2, Cebu City, Cebu, Philippines

CAPABILITIES AND EXPERIENCES:

I am a graduate of Electronics and Communication Engineering with Basic Management Program Diploma at Asian Institute of Management who has been highly exposed in the fields of Maintenance Management, Development and Implementation of Computerized Maintenance Management System, Maintenance Project Management, Plant Turnaround Planning and Implementation, Power Plant Commissioning, Electronics and Communication Equipment Repair, Industrial Electrical Devices Maintenance, Industrial Instrumentation and Control Maintenance, Mechanical Maintenance, for a total of 30 years of work experience:

A.) Senior Maintenance Manager:

- Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.

B.) Maintenance Consultancy:

- **Maintenance Consultant** for Philippine Associated Smelting and Refining Corporation (PASAR) in LIDE, Isabel, Leyte, Philippines.

C.) Power Plant Commissioning:

- Commissioning of CE Cebu Power Plant at Upper Mahiao, Kananga, Leyte Philippines. It has a total of 138 MW power production in 4 GCCU (Geothermal Combined Cycle Unit) and one Brine Plant. Each GCCU has one 20 MW none condensing steam turbine and three 4.5 MW generator, each is driven by two unfired gas turbine with fully automated control system. The brine plant is a single 4.5 MW generator driven by two unfired gas turbine with fully automated control system. 1996
- Commissioning of Visayas Power Plant Company (VGPC) at Tongonan, Kananga, Leyte, Philippines. It has a total power production of 210 MW in three 70 MW generating units. It has a direct contact condensing steam turbine with DCS control system. 1997
- Commissioning of CE Luzon Power Plant at Mahanagdong, Tongonan, Ormoc City, Leyte, Philippines. It has a total power production of 180 MW in three 60 MW generating units in two sites (site A and Site B) of about 5 KM apart. Site A has two 60 MW generating units with control capability over site B. Site B has one 60 MW generating unit with independent control capability. 1997
- Commissioning of CE Casecnan Power Plant at Pantabangan, Nueva Ecija, Philippines. It has a total power production of 300 MW in two 150 MW Hydro-power generating units. The intake is located at Nueva Viscaya via 26 KM tunnel. 2000

D.) Computerized Maintenance Management System (CMMS)

- Have setup the CMMS of CalEnergy Philippine Operation, manage the implementation and generated customized maintenance reports.
- Have developed CMMS operation procedures suitable for none computer literate users.
- Have developed the CMMS to have a very user's friendly environments.
- Have successfully managed the annual shutdown through CMMS.

E.) Plant Turnaround

- Manage the planning and implementation of annual plant turnaround of the three CalEnergy Power Plants in Leyte, Philippines. 1998 - 2004
- Manage the planning of plant turnaround of CalEnergy Casecnan. 2003

F.) Industrial Maintenance

- **Operation and Technical Manager of VEMER'S** - Prepare annual budget for Operation and Marketing group and submit to the General Manager for final approval. Review and

approved monthly forecast budget for marketing and operation group. Personally prepare technical proposal for projects with total cost from 500,000.00 (Philippine currencies) and above. Review and approve the submission of technical proposals with total project cost less than 500,000.00 (Philippine currencies). Insures the delivery of total solution to client-raised problems and conduct technical training the client company staff as may be necessary. Conduct a thorough analysis of the problem raised by the client. Establish its root cause and recommend corrective measures then firm-up a preventive maintenance actions to minimize if not eliminate the recurrence of the problem. Personally supervised the implementation of projects with total cost 500,000.00 and above. Provide technical training to every staff to maintain technical competitiveness in all services rendered. June 2004 to Present

- **Maintenance Systems Administrator for CalEnergy Philippine Operation** - Directly reporting to the General Manager of CalEnergy Leyte Operation and the General Manager of CalEnergy Casecan. Develops, implements and maintain a work management systems and process for the efficient management of the Central Maintenance Department, and assist the Plant Maintenance Supervisors with development services. Manage the development of annual shutdown plan. Develop a comprehensive shutdown schedule and manage its implementation. Assures accurate and complete documentation of every shutdown activities. Coordinate work to his staff to ensure an efficient use of resources at his disposal. Allocate work to his staff to ensure an efficient and effective use of resources at his disposal. Assist other Services and Operations Personnel as necessary. Prepares weekly accomplishment reports and give feedback to General Managers on the progress or highlights of the activities or task assigned. Reviews failure analysis reports and submits impression/analysis reports. Directs and supervises troubleshooting involving all trade (Mechanical, Electrical, Instrumentation and Control Technicians) as may be necessary depending on the criticality of the plant problem that will affect the entire plant operation. He is then expected to correct such operational problem at the soonest possible time. When situation requires he is tasked to monitor the operation of process control equipment, electrical and mechanical equipment and instrumentation. Advises plants Maintenance Supervisor of equipment malfunctions and operational difficulties, conduct troubleshooting and isolates causes and supervises necessary repairs and adjustments. **ACHIEVEMENTS:** Have managed to organize the Computerize Maintenance Management System (CMMS) at its optimum operation for Philippine Operation. Have developed CMMS operation procedures suitable for none computer literate users. Have developed the CMMS to have a very user's friendly environments. Have successfully managed the annual shutdown through CMMS. Have actively participated in the formulation of CalEnergy Philippine Operation Risk Management Program. Have successfully implemented the precision maintenance program for the CalEnergy Philippine Operation. May 2002 to March 31, 2004
- **Maintenance Systems Administrator for CalEnergy Leyte Operation** - Directly reporting to the General Manager of CalEnergy Leyte Operations. Develops, implements and maintain a work management systems and process for the efficient management of the Central Maintenance Department, and assist the Plant Maintenance Supervisors with development services. Coordinate work to his staff to ensure an efficient use of resources at his disposal. Allocate work to his staff to ensure an efficient and effective use of resources at his disposal. Assist other Services and Operations Personnel as necessary. Prepares weekly accomplishment reports and give feedback to General Manager on the progress or highlights of the activities or task assigned. Reviews failure analysis reports and submits impression/analysis reports. Directs and supervises Instrumentation and Control Technicians in the correct use of tools, safety equipment and helps them understand the operating principles, the purpose, functions

and relationships of each instrument in loop, be it a control or information loop. When situation requires he is tasked to monitor the operation of process control equipment, electrical and mechanical equipment and instrumentation. Advises plants Maintenance Supervisor of equipment malfunctions and operational difficulties, conduct troubleshooting and isolates causes and supervises necessary repairs and adjustments. **ACHIEVEMENTS:** Have developed and implemented the maintenance inter-plant cross training program. Have developed and implemented the maintenance inter-plant cross training program for multi-skilling purposes. Have organized the maintenance planning and implementation procedures that eventually reduced the contracted maintenance man-hour to zero, which previously 110% of the in house maintenance man-hour. Have developed and implemented the maintenance day-off scheme, which satisfy both the need of the personnel and the operational requirements of the plants. Have developed a more accurate and comprehensive shutdown monitoring report that lead to the early accomplishment of every shutdown activities. March 2000 to March 2002

- **Lead Instrumentation Technician for CalEnergy Leyte Operation** - Directly reporting to the Central Maintenance Manager. Responsible of all instrumentation maintenance activities for the four CalEnergy Leyte Operations plant which are 10Km apart (average) with a total power production of 553 MW. Performs planning and implementation of preventive maintenance activities for instrumentation section. Performs on call services during night operation and during Week Ends. Performs Instrumentation, system, and process troubleshooting to any of the four plants. Performs analysis, design review; generate reports and recommendation for any irregular problems involving instrumentation for the four plants. Provide technical assistance to operation personnel's in some operation problem link to instrumentation. Plan and recommend training program (local and abroad) to all instrumentation personnel. **ACHIEVEMENTS:** Have developed and implemented the fire protection and fire suppression maintenance program. Have first developed and implemented the instrumentation technician interplant rotation program that enable all the instrumentation technician to get familiar of all the three plants in Leyte Operations for the company's advantage. Have redesigned and implemented the condensate pump control within one day just to save the operation and its been used to the present. Have developed the commissioning procedure for the three plants of Leyte Operation that is implemented every after annual shutdown. Have redesigned the Hydrogen Sulfide Gas Abatement Plant to save the environment for possible pollution if the said plant was down for a longer period. Have done most of the annual maintenance planning. February 1997 to March 2000

- **Instrumentation Technician for Calnergy Leyte Operation** - Installation, repair and calibration of electronic, electrical, pneumatic, electro-pneumatic and hydraulic operated instruments. Testing and commissioning of process industrial instrument in the process control system in conformity to its process operation. Loop checking and function check of instrument from primary control element to final control loop. Perform preventive maintenance such as overhauling, reconditioning and replacement of damage parts to insure equipment optimum performance. Quick troubleshooting and repair of controls and its associated parts in the control system to prevent down time. Inspection and monitoring of equipment working status during operation to ensure reliability and safety. Making of instrument calibration reports during maintenance shutdown works. **ACHIEVEMENTS:** Have shared to my peers the knowledge of engineering approach to troubleshooting that eventually changed their troubleshooting methodology gained from their long experience into a more effective way of correcting equipment control problem down to the root cause. Have corrected the GE static Voltage Regular problem of the four main generators without any help of any

consultant where all in-house electricians have already given-up. Have been heavily involved in most part of the commissioning activities for all the three plants in Leyte Operations. February 1996 to January 1997

G.) Industrial Construction

- **Instrumentation General Forman for Tierra International Construction** - Plans and implement all instrumentation activities within the project in conformity to the over all schedule. Review drawing and make revision recommendation for the good of the project. Direct supervision of the two instrumentation foremen. **ACHIEVEMENTS:** Have organized the minimum number of personnel in the instrumentation and control team just enough to catch-up with the instrumentation and control activities every after the completion of mechanical works. Have recommended and implemented construction revision that improved the project quality which benefited the owner of the project and reduced the project cost that benefited the project contractor. September 1995 to January 15, 1996
- **Instrumentation Technician for Tierra International Construction** - Assist E/I Superintendent in reviewing instrumentation drawings. Assist Mechanical group in some instrument related task. **ACHIEVEMENTS:** Have made valuable recommendations to instrumentation installation drawing revision for easy instrument installation and to insure that the instrument will function properly considering the project site weather condition. August 1995 to September 1995

H.) Small Electronics Manufacturing

- **Production Superintendent for Cellar Electronics** - Design and implementation of propose electronic product. Provide training to technical factory workers. Plan and organize the marketing group. Provide training to the marketing personnel's. Provide technical assistance to the marketing group. Direct supervision to every employee in the factory. **ACHIEVEMENTS:** Have developed three products as an alternative solution to frequent electric power disturbance in Cebu City during those time. Have effectively trained fresh graduated personnel in the production line. Have organized the marketing arm to effectively market the finish product. June 1993 to June 1995

I.) Teaching (Field of Engineering)

- **Instructor for Cebu Institute of Technology ECE Department** - Subjects: Instrumentation and Control Design, Electronic Circuit Design, Communication System Analyses and Design, Basic Computer Circuit, Logic Circuit Design, Troubleshooting (Engineering Approach), Data Communication. **ACHIEVEMENTS:** Have revised the curriculum for the troubleshooting subject to fit it to Engineering Approach to Troubleshooting. Have designed and built new electronic and communication laboratory equipments. June 1991 to May 1993

J.) Electronics Appliance Repair

- **VCR Technician for Philips Service Center, Tacloban City, Leyte, Philippines** - Troubleshoot and repair all kind of VCR regardless of Brand. Assist Audio and Video Technicians for some extraordinary troubles. **ACHIEVEMENTS:** Have shared to other technicians the knowledge of engineering approach to troubleshooting that eventually changed their troubleshooting methodology gained from their long experience into a more effective way of correcting electronic appliance problem down to the root cause. November 1990 to May 1991
- **Electronic Appliance Technician while in College** - At the start, I just did a friendly appliance repair to some of my classmates without knowing that their parents recommended me to their family friends. In a year time, I did have more and more costumers that I then need more time for it. Financially at that time, I am not capable of supporting my school needs including board

and lodging. School fees were not a problem because I was a full academic scholar. I then decided to give enough time being an appliance technician with my growing costumers, though in return, I lose my scholarship but I manage to support myself in my studies and graduated in the same number of years. I then have even enough money to help support my elder sister in her occasional school activities fee needs. 1985 - 1990

- **AM Radio technician while in High School** - After completing the six Saturday half days session of AM radio technician course which I was the top 1 and youngest among our class. This was during my first year in High School. I then start repairing AM radio for free until I graduated in High School. 1982 - 1985

PROJECTS UNDERTAKEN AS VDEMTECH

The full detailed list of the projects vdemtech had undertook

DATE	PROJECT	
08/04/2022	H6 Schindler lift earthquake damage repair	New Coast Hotel Inc.
08/01/2022	4 Storey Building Elevator Installation	Ms. Lucille Abellana
07/27/2022	H5 & H6 Schindler Elevator Duplex Modernization	New Coast Hotel Manila
07/27/2022	H6 Schindler Lift Control Modernization	New Coast Hotel Inc.
06/27/2022	E1 Schindler Escalator handrail supply & installation	Marina Square Properties Inc.
06/24/2022	H2 Schindler lift traction rope supply and installation	New Coast Hotel Inc.
06/09/2022	Generator Control Upgrade	Concrete Restoration and Repair Technology Inc.
05/29/2022	H2 Schindler Elevator Compensating rope re-tensioning	New Coast Hotel Inc.
05/21/2022	H5 Schindler Lift Traction gearbox rubber coupling replacement	New Coast Hotel Inc.
04/13/2022	Fuji elevator parts supply	Marina Square Properties Inc.
04/12/2022	4 Unit AVR Installation and Commissioning	Holiday Inn Hotel Makati
03/21/2022	Offsite Elevator Inspection, Troubleshoot & Repair	Hotel Stotsenberg (Pampanga)
30/12/2021	Elevator construction and commission rescue	Acoolyukon Industrial
13/12/2021	Carlton Car 3 LG-Otis overspeed governor refurbish & rope replacement	California Garden Square

MISSION

To provide engineering and technical solutions that are responsive to our clients' needs in an innovative, cost effective, professional, quality service manner by combining highly-skilled team members with our proven technology.

To utilize our common values and in achieving our business objective of having you as a satisfied client.

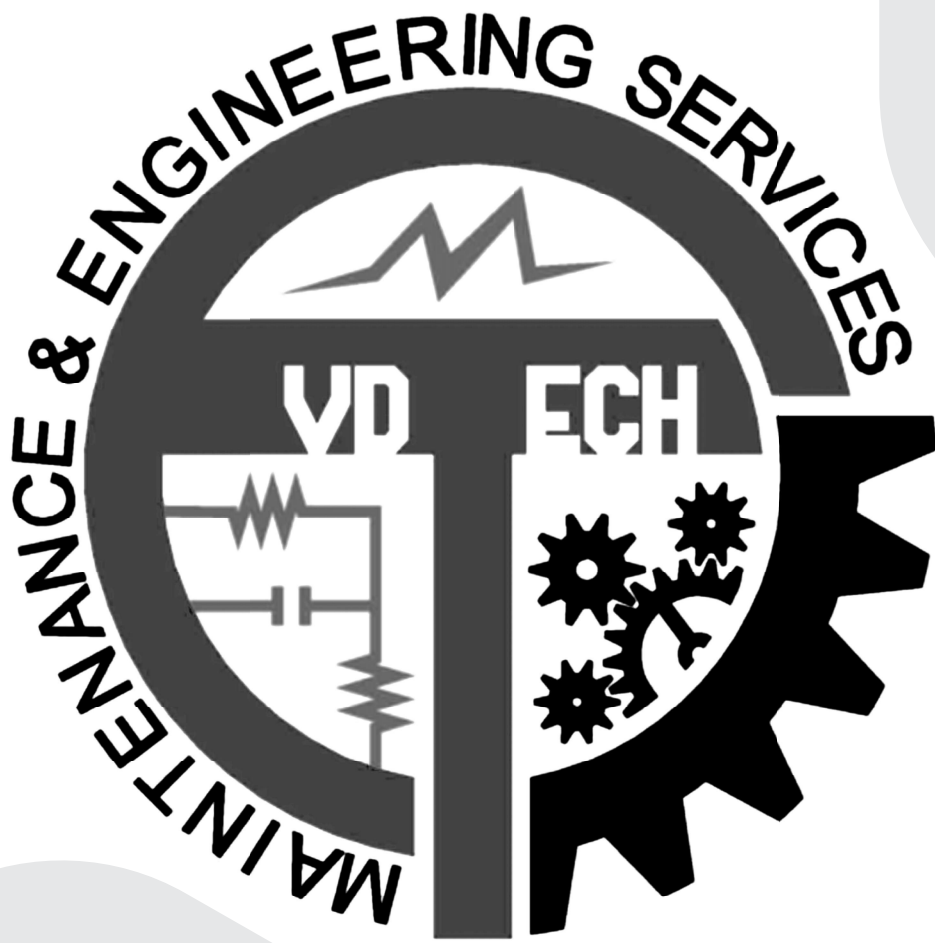

VISION

Be globally competitive and most respected technical and engineering solutions provider, well recognized for its consistent quality services

When you're a carpenter making a beautiful chest of drawers, you're not going to use a piece of plywood on the back, even though it faces the wall and nobody will see it. You'll know it's there, so you're going to use a beautiful piece of wood on the back. For you to sleep well at night, the aesthetic, the quality, has to be carried all the way through.

— Steve Jobs
